UVTON Announces Deep UV LEDs Sales

PRESS RELEASES

Columbia, South Carolina., November 3, 2025

UVTON, Inc. today announced completion of patenting of Company's GEN1 compact disinfection device, which now include three U.S. patents: US 11,484,612 US 12,186,440 and US 12,377,179.

Design of compact, pocket-size disinfection device for small footprint objects such as Hearing Aid Devices, AirPods enables 360º exposure capability in order to eliminate shadowing effects and provide reliable and repeatable surface disinfection of irregularly shaped objects. Prototype devices were successfully bio-tested for eradication of various microorganisms by a third party and are ready for industrial product design.

About UVTON:

UVTON, Inc., a DUV LED-based device and solutions provider for industrial and commercial markets.
